INTRODUCTION

Off-campus study centers are an important segment of the Federal career development program. These centers, established by cooperative agreements between Federal agencies and nearby colleges and universities, enable large numbers of Federal employees to continue their formal education without extended job absence and at relatively low cost to the individual or his agency. Bringing the college campus to the work site - in order to utilize agencies' classroom space, laboratory and library facilities, training equipment and aids - combines university curricula with on-site resources and conveniences.

This document, which is one of three major training and education resource publications from the Civil Service Commission, provides Federal managers, trainers, and employees with current information on individual off-campus study centers, including the variety of programs offered by each. This directory and the other training resource documents (Interagency Training Programs Bulletins and calendars, Agency Training Centers for Federal Employees) provide a wide array of training opportunities for Federal employees.

Each year off-campus participation has increased significantly. In FY 69, fourteen Federal agencies reported the operation of 116 off-campus study centers in cooperation with 108 schools and universities. Over 26,000 Federal civilian employees attended courses offered at centers located in 30 states, the District of Columbia, Puerto Rico and Europe. Not only is there a continuing increase in the number of Federal employee participants in these programs, but also in the number of cooperating universities. (See Tables 1 and 2, and Figure 1.)

Off-Campus Study Centers for Federal Employees is not a testimonial to past government-university relationships but a guide to cooperative educational resource opportunities which the Civil Service Commission recommends be fully utilized. It should also stimulate agencies to further their creative relationships with universities in order to meet new educational challenges that will arise in the future. These same educational challenges will also be faced by State and local governments. Therefore, in a spirit of intergovernmental cooperation, State and local governments should be invited and encouraged by agencies to make use of off-campus study facilities.

Agencies interested in establishing off-campus study programs are encouraged to use the "information contact" given in the description of each off-campus study center. In addition, assistance may be received by contacting any Civil Service Commission Regional Training Center listed on page 2 or the Bureau of Training, Washington, D. C., Area Code 202, 632-5660.
